

Construction Specialist since 1978

RICHARD CARLSON LLC

Established in 1978, we specialize in new home construction, major remodeling and unique projects. For 33 years we have built home in many areas and many styles throughout Southern Illinois.

Our goal is to build the project you want, one that you will be proud of when we're finished. Whether your project is simple or complex our crews are skilled and courteous. We strive to make the building process enjoyable. We can build your plans or help you design everything from scratch.

We have extensive connections with suppliers and can source any style of material or finish and have it professionally installed. We also have a full wood shop and can produce built ins, mouldings, stairs, or special pieces as needed in any wood. Please take a moment to view our photos of recent projects and drop us an email if we might be a part of your next project.

If it can't be found, Rich will build it.
